

truSculpt iD

Frequently Asked Questions

What is truSculpt iD®?

truSculpt iD allows you to personalize your ideal body with a revolutionary non-surgical, body-sculpting treatment. Its comfortable, safe, and effective technology is clinically proven to permanently eliminate fat cells in stubborn areas around your abdomen and flanks.

Am I a candidate for truSculpt iD?

Because truSculpt iD is a customized and tailored treatment to meet individual needs, most adult men and women are a candidate.

Can truSculpt iD be used on all skin types?

Yes, this treatment can be done on all skin types and over tattoos.

How long does a treatment take?

Procedure time depends on the size and number of treatment areas. It typically takes 15 to 30 minutes to treat the abdomen and flanks.

How many treatments will be needed?

Multiple areas can be treated in as little as one 15-minute session. Additional treatments may be required to achieve the personalized results you desire.

What will the treatment feel like?

truSculpt iD procedures are typically described as feeling like a hot stone massage. During treatment, the temperature of your skin will rise but remain comfortable. It's effective, safe, and the results are even and consistent.

Is there really no downtime?

Post-procedure, the treatment area will be warm and flushed for less than one hour. While you may experience mild sensitivity to the touch for a few days, you'll be able to immediately return to normal activities and exercise.

When will I see results?

Results are visible after just one treatment, with maximum results seen after 12 weeks. Additional treatments may be required to achieve the personalized results you desire.
